Real-time Data

Fin24 Monitor streams live market data directly to your desktop, providing the ideal solution for market participants requiring the most up-to-date information at a **very affordable price**.

FEATURES

Ease of use:

The logical, intuitive layout creates an extremely user-friendly experience. JSE data is dynamically streamed to all components open in the system, removing any need to refresh the page to receive updated data.

Customisation:

At the heart of the system is the ability to create an unlimited number of watchlists. Users have complete control over the information fields presented in each watchlist. These unique user settings may be saved for future reference.
